Summary

On-Demand CTO with 15+ years in tech and 8 years in CTO roles, blending SaaS and Blockchain (EVM/Solana) expertise. I help startups launch, scale, and secure Web2/3 products by aligning technical vision with business strategy. As a hands-on/off leader, I guide engineering teams, design scalable platforms, and build smart contracts and dApps. My experience spans fullstack development, agile methodologies, and cybersecurity. I offer startups a reliable partner to transform ideas into high-impact products with pragmatic, results-driven strategies. Whether growing SaaS platforms or launching secure blockchain apps, I tailor my approach to maximize value and accelerate success.

Skills

Top Skills CTO, EVM, Ethereum, Solidity, dApps, Fullstack development
Languages English (Full Professional), French (Native), German (Elementary)

Experience

- 2024– Present **Chief Technology Officer**, *HelloMax*, Paris
Strategic, technical and management consulting. Developed Solidity smart contracts, dApps, and performed fullstack development.
- 2024– Present **Chief Technology Officer**, *Titans Collective*, Paris
Led audits, recruitment, and technical strategies. Delivered blockchain and fullstack solutions as On-demand CTO.
- 2025– Present **Final Certification Jury**, *Alyra*, Paris
Jury member for EVM blockchain developer certifications.
- 2023–2024 **Chief Technology Officer**, *EGERIE*, Toulon
Led 40 engineers. Audited and reorganized engineering, implemented processes, tools, and middle management.
- 2022–2023 **Head of Engineering**, *Choose*, Paris
Managed 15 engineers. Established career paths, optimized methodologies, and led technical roadmap.
- 2021–2022 **Director Of Engineering**, *Salsify*, Paris
Managed 20+ engineers. Merged Alkemics/Salsify, led recruitment, aligned cross-functional roadmaps.
- 2020–2020 **Head Of Engineering**, *Qare*, Paris
Led 20+ engineers. Managed 4 product lines, ensured security, optimized Agile practices.
- 2019–2020 **Technical Advisor**, *Memorizer*, Paris
Advised founders and tech teams. Bootstrapped MVP of AI-driven memory-enhancement app.

- 2017–2020 **On-Demand CTO**, *Auto-entrepreneur*, Paris
Consulted for startups. Built engineering teams, launched products, led Homeloop's 25M€ fundraising.
- 2016–2017 **Co-Founder & CTO**, *MyCoGa*, Paris
Built fullstack IoT products. Managed 20+ engineers, led fundraising, and developed prototypes.
- 2015–2015 **Deputy CTO**, *bluenove*, Levallois-Perret
Rebuilt engineering from scratch. Managed 8 engineers, executed tech projects under pressure.
- 2011–2015 **Senior Dev / Pentester**, *I-TRACING*, Puteaux
Developed fraud and DPI tools. Delivered security audits for major firms (PMU, Qosmos).
- 2008–2010 **Software Dev & Consultant**, *BT*, Puteaux
Built biometric access systems for Eutelsat. Delivered secure software and RFID integrations.

Education

- 2024 **Solana Developer**, *Alyra, l'école blockchain*
Advanced training in Solana development and decentralized applications.
- 2024 **Blockchain Developer**, *Alyra, l'école blockchain*
Intensive training in blockchain technologies including Ethereum and smart contracts.
- 2007 **Expert in Computer Systems and Networks**, *ESGI*
Comprehensive engineering curriculum covering systems, networks, and software architecture.
